## Singing Tree Chardonnay

- The name “Singing Tree” comes from the flocks of birds who wait patiently in the trees for their turn at the fruit during harvest.
- This is a boutique production wine of less than 5000 cases from the heart of premium Chardonnay vineyards within the Russian River, Sonoma.
- Only 10% of the wines is aged in new French barrels. Older barrels add to texture without imparting flavor, so the wine has clean, bright acidity without being oaky!
- Singing Tree uses old vineyards with Heritage Clones (See Selection) which exhibits melon and citrus characters.
